

Precise. Custom. Reliable.

FilConn offers high reliability filtered and EMP suppression custom configured connectors, focused on today's unique engineering challenges.

Our aerospace and military grade specialty connectors are focused on filtering and transient suppression in custom configurations.

FilConn has a 25+ year track record for delivering innovative connector design and consulting services for leading mil-aero OEMs.

- » **Rapid custom product development, hands-on technical customer support, and quick-turn manufacturing**
- » **Innovative designs that solve complex and challenging application problems**
- » **Connector industry leaders in custom connector design and manufacture**
- » **Precision machined parts are produced rapidly and meet the highest quality standards at FilConn's AS9100 Rev D certified facility**
- » **Each customer is assigned to an engineer with years of experience so technical questions are answered expediently**
