

New Advanced Lanyard Release Connector

FilConn Lanyard Release Connectors offer increased reliability, backwards-compatibility and superior release performance, making them a perfect choice for demanding aerospace and defense applications.

APPLICATIONS

- Weapons Release
- Military Aviation

FEATURES

- Jam proof even if pulled at 45-degree angle
- Typical to 20-100 pounds (above 50, difficult to demate manually)
- Available in MIL-Spec or custom insert configurations

BENEFITS

- Set precise release force through adjustable demating force
- Mate/demate for 250 cycles with no degradation, guaranteed
- Cost effective alternative to industry standard parts
- Quick turnaround with 8-10 weeks for delivery of new designs

Patent Pending
